

511.102 Security of Information Technology Data

For actions that pertain to information systems or contractor managed government data, use the guidance identified under GSA's office of the Senior Agency Information Security Officer publication CIO IT Security Procedural Guide 09-48. The guide can be accessed at <http://www.gsa.gov/portal/category/25690>. The contracting officer shall coordinate with program officials or requiring activities to ensure that the solicitation includes the appropriate information security requirements. The information security requirements must be sufficiently detailed to enable contractors to fully understand the information security regulations, mandates, and requirements under the contract or task order.
